

# Negative team

Physician shortage will be solved by increasing the number of medical students because...

1. The number of doctors per  
population of 100000 in OECD

average ... 290

Japan ... <200

26th among 29 member states!

2. Japanese population is decreasing now.

3. Regional uneven distribution will  
be solved gradually

## 4. Need to respect doctors' career choice

5. Any political strategy will take time to be implemented
