

Evidence-based Medicine Open Seminar

“Building and Using Evidence”

1. Time and place

Time: 13:30 – 16:00 Place: University Library

2. Target

This seminar is open to physicians and university faculty who are interested in EBM.

**Participants of the Course VI-1 are welcome to bring their friends and colleagues.*

3. Presentations

1. Evidence in global health policy and programs

Rebecca Schoon, Oregon State University

2. Building evidence in community

Tran Tuan, Research and Training Center for Community Development

3. Reference management for the literature review and scientific writing

Le Cu Linh, Hanoi School of Public Health

** All presentations are in Vietnamese or with Vietnamese translation.*

4. Schedule

Opening

13:40-14:40 Evidence in global health

14:40-15:20 Building evidence in community

15:20-16:00 Reference management

Closing

EVIDENCE IN GLOBAL HEALTH POLICY AND PROGRAMS

Rebecca Schoon, MPH, PhD Candidate
Chunhuei Chi, ScD
Leslie Corless, MPH

OSU
Oregon State
UNIVERSITY

Oregon State University

College of Public Health and Human Sciences
Center for Global Health

“An important factor that can help [Vietnam’s] health system...is the availability and quality of information on which decisions are based.

...scientific evidence on health is crucial for policy changes and interventions and, when the evidence is compelling, actions toward better health and health care should be **taken.”**

Hinh, N.D. and Ming, H.V. (2013). Public health in Vietnam: scientific evidence for policy changes and interventions. *Global Health Action*, 6:

Role of Evidence in Global Health

- Evidence-Based Medicine originally for clinical practice yet the concept is now applied to public health policy
- Scarce resources vs. competing health needs
 - Health care opportunity costs → constant pressure to demonstrate better results and justify spending.
- Data can influence government policies, hospital administration, societal opinion, etc.

Critical Areas of influence

□ Priority setting and resource allocation

- Primary Health Care, infectious/chronic diseases
- Equity/Access to care
- Population prioritization

□ Program design

- Best practices

□ Evaluation

- Is the program/policy working? Is intervention having the desired effect?
- Is the program/policy worth implementing?

A Changing Landscape

- Research questions change over time
 - ▣ As population demographics, economics, technologies change, so do health priorities
- *What kinds of health challenges are occurring today?*
- *How will that change over the next 10 years?*
- *What kinds of epidemiological research can investigate these trends and better prepare our health systems for current and future needs?*

Evidence-based decision-making

Vietnam (Hinh & Ming 2013)

- High life expectancy
- 1990–2009:
 - Infant mortality rate 44.4% → 16%
 - Under-5 mortality rate 58% → 24.5%
 - Maternal Mortality Ratio 233/100,000 births → 69/100,000

Attributed to: health care delivery network, increasing numbers of qualified health workers and national public health programs

Yet equity/access, non-communicable and infectious diseases, health system infrastructure will require growing focus

Examples from the literature

□ Public health services use in a mountainous area, Vietnam: implications for health policy (2002)

NV Toan, LN Trong, B Hojer, and LA Persson

- Research questions:
 - What are the determinants of public health service utilization?
 - Are these determinants different in mountainous regions?
 - How have policies exempting patients from user-fees been implemented? Are they working to increase access to care?
- Cross-sectional design
- Analysis: “Long distances in combination with failure of the fee exemption may increase inequity in use of health services in remote and isolated areas”

Examples from the literature

□ Ethnic minority health in Vietnam: a review exposing horizontal inequity (2013)

M Målqvist, DTP Hoa, NT Liem, A Thorson, and S Thomsen

- Hypothesis: ethnicity is a significant, yet overlooked, variable in determining health equity
- Meta-analysis (systematic literature review)
- Analysis: “Awareness of ethnicity as a determinant of health, not only as a covariate of poverty or living area, needs to be improved, and research needs to be designed with this in mind”

Evidence in Context

Evidence is one component of policy-making

- ▣ Institutions
- ▣ Interests
- ▣ Incidents
- ▣ Ideas ← *evidence*

Evidence is a necessary but not sufficient condition for improved health policies and programs

Researchers/practitioners have an important role in informing policymakers through introducing and explaining data

“Success of interventions depends on local feasibility, acceptability, and fit with context—and hence on informed, shared decision making with and by local communities, using summaries and visualisations of population level metrics.”

Greenhalgh, Howick & Maskrey 2011
*Evidence based medicine: a movement in
crisis?*

*Local relevance
& fit*

“Success of interventions depends on **local feasibility, acceptability, and fit with context**—and hence on informed, shared decision making with and by local communities, using summaries and visualisations of population level metrics.”

Epidemiological Research Training Course VI - 1

August 3-7, 2014

University of Medicine and Pharmacy

Ho Chi Minh City, Vietnam

Building evidence in community

Tran Tuan MD; PhD

Director, Research and Training Centre for Community
Development (RTCCD) &

Chairman, Evidence-Based Health Policy Development
Coalition (EBHPD) Standing Committee

Content

1. “Community” - from Epidemiological researchers’ perspective
 - a. Epidemiological research?
 - b. Community environment & clinical environment?

2. Building evidence in community?
 - a. Differences in Building research team and launching an epidemiological research in community and in hospital settings?
 - b. Relationships between “community” and epidemiological research?
 - c. Case study from Hanam field lab

3. Epidemiological research evidence and health policy advocacy
 - a. From epidemiological research on depression and anxiety to intervention on comprehensive children development and health insurance scheme for mother and children in Vietnam
 - b. Research on health consequences of asbestos and policy debate in Vietnam
 - c. Revised Law on child care, protection and education in 2015: needs for evidences from clinical and field epidemiology research in Vietnam

1. Community and epidemiological research

a. The purpose of epidemiology

- Estimating and explaining differences between communities in health and diseases.
- Providing scientific knowledge /evidence for building:
 - Health care system &
 - Health policy
- The objective is to create social change -> evidence for policy advocacy

b. “Community” environment and “clinical” environment?

- Clinical?
- Community?
 - Organization: government, civil society
 - Community health
 - Positive and negative factors

2. Building evidence in community

- a. What is the difference between launching an epidemiological research in community and in clinical environment?
 - Collection of information
 - Research design
 - Team organization
 - Data management
 - Result analysis
- b. The relationship between “Community” and epidemiological research?
 - Community: subject for epidemiological research
 - Community: subject using epidemiological research result
 - Who benefits from the epidemiological research result?
 - Exploit the research result: The research on the harmful effects of asbestos on workers’ health in Vietnam”
- c. Case study from field lab in Hanam
 - Professional research team
 - Transparency, accountability and funding

3. Evidence from epidemiological research and health policy advocacy

- a. From epidemiological research on maternal and child health care to intervention on comprehensive child development and health insurance in Vietnam
→ *Good community research leads to a good policy*
- b. Research on harmful effects of asbestos and policy debate on using asbestos in Vietnam
→ *Biased research leads to bad policy*
- c. Revised Law on Child care, protection and educations in 2015: : needs for evidences from clinical and field epidemiology research in Vietnam
→ *The needs to analyze case-study from clinical environment and community settings*

Lessons

- Epidemiology is to provide methods to help identify the source of errors in clinical and public health research.
- The researchers who master on epidemiological methods will be able to critically review a research report or publication to identify and weight scientific evidence for using in public health policy development
- A poor, biased research not only could not identify right answers for the proposed objectives, but also brings chances for some groups to develop policy decisions that will bring harmful to community health
- Building evidence for public health care activities is not only to do epidemiological research to find new evidence and to publish scientific papers. In the case of Vietnam, it is necessary that the researchers use epidemiological knowledge to analyze the “evidence” that is used by policy makers.
- If we want to have good research evidence from the community, we should build taskforces and professional epidemiological research team at community context.

Epidemiological Research Training Course VI - 1

August 3-7, 2014

University of Medicine and Pharmacy

Ho Chi Minh City, Vietnam

Building evidence in community

Tạo lập bằng chứng nghiên cứu từ cộng đồng

Tran Tuan MD; PhD

Director, Research and Training Centre for Community
Development (RTCCD) &

Chairman, Evidence-Based Health Policy Development
Coalition (EBHPD) Standing Committee

Nội dung

1. “Community”- “Cộng đồng” từ góc nhìn của nhà nghiên cứu dịch tễ học
 - a. Nghiên cứu dịch tễ học?
 - b. Môi trường cộng đồng & môi trường lâm sàng?

2. Tạo lập bằng chứng nghiên cứu từ cộng đồng?
 - a. Xây dựng cơ sở nghiên cứu dịch tễ học tại cộng đồng & tại bệnh viện?
 - b. Mối quan hệ giữa cộng đồng và nghiên cứu dịch tễ học?
 - c. Bài học cơ sở nghiên cứu thực địa Hà nam

3. Bằng chứng nghiên cứu dịch tễ học và vận động chính sách y tế
 - a. Từ nghiên cứu dịch tễ học trầm cảm, lo âu tới can thiệp phát triển trẻ toàn diện và Bảo hiểm y tế
 - b. Nghiên cứu tác hại của Amiang và tranh cãi chính sách
 - c. Luật bảo vệ chăm sóc và giáo dục trẻ em: những vấn đề đặt ra cho nghiên cứu lâm sàng và dịch tễ học

1. Cộng đồng và nghiên cứu dịch tễ học

a. Dịch tễ học phục vụ cho mục tiêu gì?

- Đi tìm sự khác biệt trong cộng đồng về bệnh tật/sức khỏe
- Hiểu biết khoa học
 - chăm sóc sức khỏe &
 - chăm sóc y tế
- Đích đến tạo sự thay đổi xã hội → bằng chứng để vận động chính sách

b. Môi trường “công đồng” và môi trường “lâm sàng” ?

- Lâm sàng?
- Cộng đồng?
 - Có tổ chức: chính phủ, xã hội dân sự
 - Sức khỏe cộng đồng
 - Yếu tố tích cực, tiêu cực

2. Tạo lập bằng chứng nghiên cứu từ cộng đồng

- a. Xây dựng cơ sở nghiên cứu dịch tễ học trong cộng đồng khác gì với trong môi trường bệnh viện?
 - Thông tin thu thập?
 - Thiết kế nghiên cứu?
 - Tổ chức đội ngũ?
 - Quản lý số liệu
 - Phân tích kết quả?
- b. Mối quan hệ qua lại giữa “Cộng đồng” & nghiên cứu DTH?
 - Cộng đồng: Đối tượng nghiên cứu dịch tễ học
 - Cộng đồng: đối tượng sử dụng kết quả nghiên cứu dịch tễ học
 - Ai hưởng lợi từ kết quả nghiên cứu dịch tễ học?
 - khai thác kết quả nghiên cứu: Câu chuyện “nghiên cứu tác hại của Amiang trên sức khỏe người lao động ở Việt nam”
- c. Bài học cơ sở nghiên cứu thực địa Hà nam
 - Đội ngũ nghiên cứu viên chuyên nghiệp
 - Minh bạch, trách nhiệm, kinh phí

3. Vận động chính sách y tế và bằng chứng nghiên cứu dịch tễ học

- a. Từ nghiên cứu dịch tễ học sức khỏe bà mẹ trẻ em tới can thiệp phát triển trẻ toàn diện và Bảo hiểm y tế
 - *Nghiên cứu cộng đồng tốt dẫn đường cho chính sách tốt*
- b. Nghiên cứu tác hại của Amiang và tranh cãi chính sách sử dụng amiang ở Việt nam
 - *Nghiên cứu tòi là chỗ dựa cho chính sách có hại*
- c. Luật bảo vệ chăm sóc và giáo dục trẻ em: những vấn đề đặt ra cho nghiên cứu lâm sàng và dịch tễ học
 - *Nhu cầu phân tích case-study từ lâm sàng và cộng đồng*

Bài học rút ra

- Dịch tễ học, là cung cấp phương pháp giúp nhận ra nguồn gốc của sai số trong nghiên cứu sức khỏe cộng đồng.
- Người làm nghiên cứu làm chủ được phương pháp dịch tễ học, sẽ có khả năng đọc ra được đâu là nghiên cứu có độ tin cậy đạt yêu cầu cung cấp bằng chứng khoa học cho công tác phát triển chính sách chăm sóc sức khỏe cộng đồng
- Một nghiên cứu tồi không chỉ dừng lại ở việc không tìm ra sự thật khách quan, mà tai hại hơn, đưa lại nguy cơ làm chỗ dựa cho những nhóm lợi ích đưa ra các chỉ định có hại cho sức khỏe cộng đồng.
- Xây dựng bằng chứng cho hành động chăm sóc sức khỏe cộng đồng, không chỉ dừng lại ở nghiên cứu dịch tễ học tìm bằng chứng mới và xuất bản bài báo khoa học . Trong điều kiện của Việt nam, rất cần các nghiên cứu sử dụng kiến thức dịch tễ học để phân tích các “bằng chứng” đang được các nhà hoạch định chính sách sử dụng.
- Muốn có bằng chứng nghiên cứu từ cộng đồng tốt, phải xây dựng lực lượng , cơ sở nghiên cứu dịch tễ học chuyên nghiệp

REFERENCE MANAGEMENT for the LITERATURE REVIEW and SCIENTIFIC WRITING

EBM Open Seminar
“Building and Using Evidence”

Linh Cu Le, MD., PhD.

Presentation outline

- Steps in Literature Review (recap)
- EndNote as the tool for reference management (with demonstration)

LITERATURE REVIEW

1. Why do we need literature review (recap)
2. Perform search for information / literature
3. Sort and manage the literature
4. Use the information collected to write the literature review (or other scientific writing)

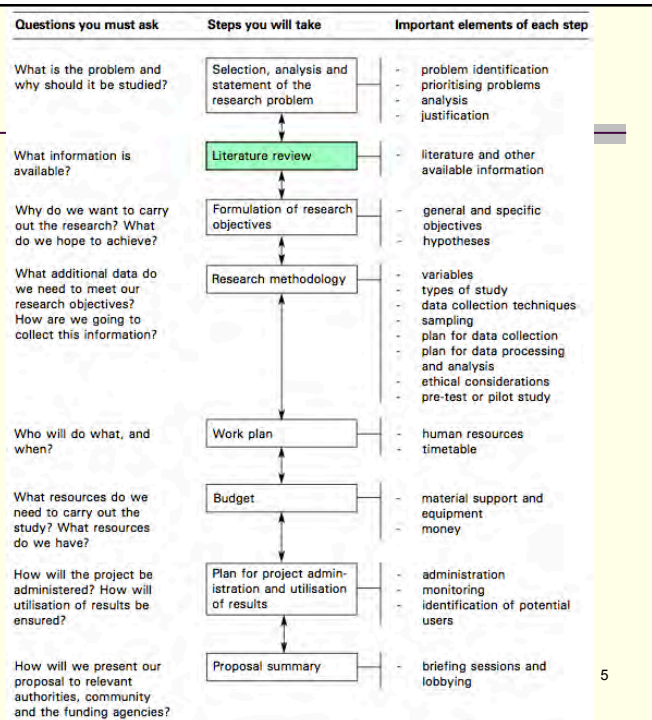

3

1. Why do we need to review

- Not to duplicate works that were done before.
- To find out what others have learned and reported on the problem we want to study (this assists us in refining statement of the problem).
- To become more familiar with the various research approaches / methods
- To provide more arguments for why our particular research project is needed

4

Literature review is one step of the whole process

5

2. Perform search for information

- Possible sources of information:
 - from individuals, groups, organisations, mass-media,
 - published information (books, articles, indexes, abstract journal, and papers in different format - especially the Internet).
 - unpublished information (grey literature): research proposals, project reports, computer data bases, internally-circulated sources, etc.

6

2. Perform search for information

- Possible sources of information: could be found at all level (community / grassroots level, district, state, national or international level).
- Information / literature collection may require individual contact/ connections (especially “grey literature”)
- Try first with electronic sources

7

2. Perform search for information

- For electronic sources: Internet is the primary source:
 - simple “google search”
 - website of government agencies, research institutes, UN and international organisations (WB, UNDP, UNICEF, UNFPA, PRB, etc.)
 - professional databases of international journals and publishers

8

2. Perform search for information

- For electronic sources: need to develop a strategy with key words and scope.
 - Key words could be the topic, terminology related to the theme, research objectives, hypothesis
 - May search the author name as well.
 - Use operators: AND, OR, NOT

9

2. Perform search for information

nursing AND Vietnam

nursing OR doctor

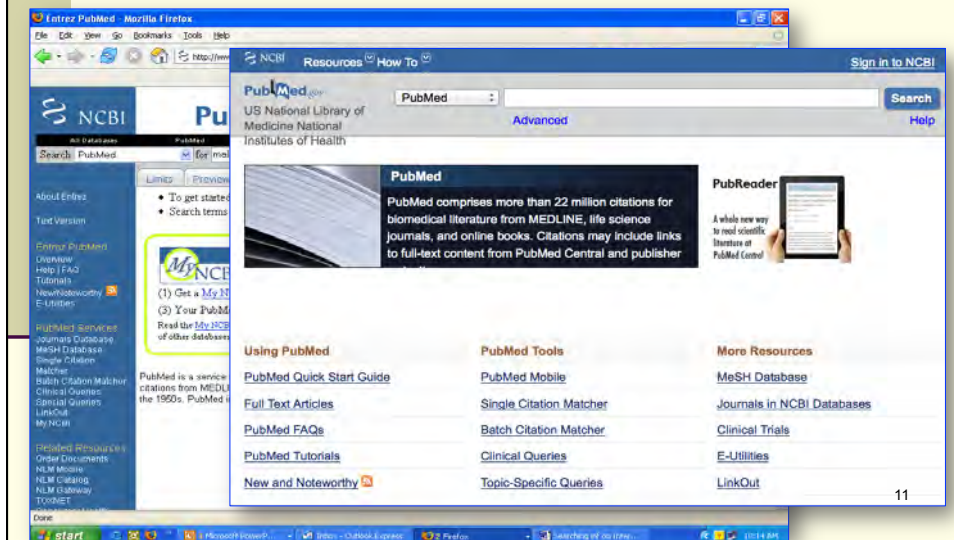

health staff NOT nurse

10

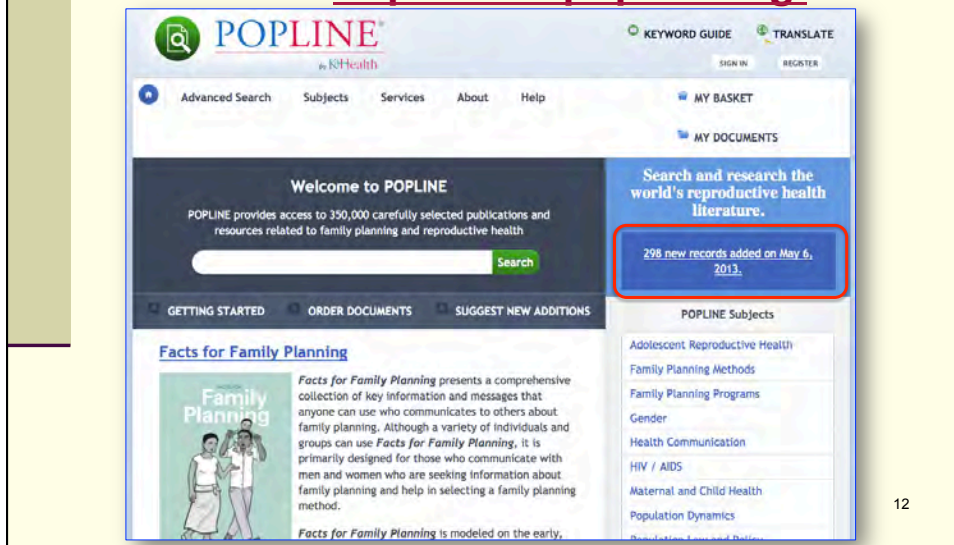

2. Perform search: online resources

- PubMed: <http://www.ncbi.nlm.nih.gov/pubmed>

2. Perform search: online resources

- POPLINE: <http://www.popline.org/>

2. Perform search: online resources

- Provide free “scanned PDF” fulltext copy

GETTING STARTED ORDER DOCUMENTS SUGGEST NEW ADDITIONS

POPLINE Database Helps a Nutrition Expert in Zimbabwe Create Evidence-Based Programs

When a program manager identifies a global development or health need, she then faces a new challenge: how to find the knowledge that will help lead to an effective program. This is why Tendai Gunda, a nutrition expert who primarily works in Zimbabwe, continues to turn to POPLINE for the information she needs to build, implement and evaluate programs. POPLINE is also seen as a resource for sharing and synthesizing new knowledge for policymakers, health care providers, researchers and teachers.

POPLINE is a bibliographic database that was established nearly 40 years ago as a comprehensive collection of population, family planning and related reproductive health and development literature. In 2001, POPLINE developed its own searchable website and, in the same year, became part of the Information and Knowledge for

POPLINE Subjects

- Adolescent Reproductive Health
- Family Planning Methods
- Family Planning Programs
- Gender
- Health Communication
- HIV / AIDS
- Maternal and Child Health
- Population Dynamics
- Population Law and Policy
- Population, Health, and Environment
- Reproductive Health
- Sexually Transmitted Infections

2. Perform search: online resources

■ example: malaria AND India

The screenshot shows the POPLINE website interface. At the top, there is a navigation menu with 'Advanced Search', 'Subjects', 'Services', 'About', and 'Help'. A red box highlights the top right corner, containing links for 'KEYWORD GUIDE', 'TRANSLATE', 'SIGN IN', 'MY BASKET', and 'MY DOCUMENTS'. Below the navigation, a message states: 'You need to log in first in order to use the 'My Documents' feature'. Underneath, there are links for 'Create new account', 'Log in', and 'Request new password'. A red box highlights the 'User account' section, which includes a 'Username' field with the value 'leculnh@gmail.com' and a 'Password' field with masked characters. Below these fields are instructions: 'Enter your POPLINE.org username.' and 'Enter the password that accompanies your username.'. There is also a link for 'Log in using OpenID' and a green 'Log in' button. The number '15' is visible in the bottom right corner of the screenshot.

2. Perform search: online resources

■ <http://www.human-resources-health.com/>

The screenshot shows the Human Resources for Health website. At the top, there is a search bar and navigation links for 'Home', 'Articles', 'Authors', 'Reviewers', 'About this Journal', and 'My HRH'. A red box highlights the 'Articles' section, which is divided into 'Latest', 'Most viewed', and 'Most forwarded'. The 'Latest' section contains two research articles: 'Human resource governance: what does governance mean for the health workforce in low- and middle-income countries?' by Kaplan AD, Dominis S, Palen JGH and Quain EE (Human Resources for Health 2013, 11:6 (15 February 2013)) and 'Career choices and what influences Nepali medical students and young doctors: a cross-sectional study' by Hayes BW and Shakya R (Human Resources for Health 2013, 11:5 (8 February 2013)). Other sections visible include 'Cases Database', 'Aims & scope', and 'Email updates'. The number '16' is visible in the bottom right corner of the screenshot.

2. Perform search: online resources

- <http://pediatrics.aappublications.org/>

The screenshot shows the homepage of the Pediatrics journal website. At the top, it says "PEDIATRICS 65" and "OFFICIAL JOURNAL OF THE AMERICAN ACADEMY OF PEDIATRICS". Below this is a navigation bar with links: Home, About, Current Issue, AAP Policy, eArchives, Supplements, Collections, eLetters, Early Releases, and Contact Us. The main content area is divided into three columns. The left column has a search bar and links for "MY PEDIATRICS" (Log In, Subscribe/Renew, Manage My Account, File Cabinet, RSS Feeds, eAlerts, New Features) and "INSTITUTIONS" (Manage My Account, Activate My Subscriptions, Librarians Portal). The middle column features the "CURRENT ISSUE" for February 1, 2013, Volume 131, Issue 2, with a thumbnail of the journal cover. The right column features the "PEDIATRICS DIGEST" with a sign-up for eAlerts and a featured article titled "Practical Community Photoscreening in Very Young Children". A red box highlights the search bar and the "App Store" link. The page number "17" is visible in the bottom right corner.

HINARI: <http://extranet.who.int/hinari>

The screenshot shows the homepage of the HINARI website. At the top, it says "HINARI Research in Health" and "Please log in to access HINARI". Below this is a login form with fields for "User name" and "Password", and buttons for "Login" and "register". The main content area is divided into three columns. The left column has links for "HINARI", "About HINARI", "Access the content", "Eligibility", "Partners", "Training Materials", and "FAQs". The middle column has a "Content Home" button and a "Find by:" section with buttons for "Subject", "Language", and "Publisher". Below this is a "Journals collection" section with a list of letters (A-Z) and a link to "View complete list of journals". The right column has a "Books collection" section with a list of letters (A-Z) and a link to "View complete list of books". The page number "18" is visible in the bottom right corner.

BMC:

<http://www.biomedcentral.com/journals>

The screenshot shows the BMC Journals website. At the top left, there is a 'Log on' button highlighted with a red box. Below the navigation bar, there is a 'Browse by subject' dropdown menu, also highlighted with a red box. The menu lists various journals under the letter 'A', including 'Acta Neuropathologica Communications', 'Acta Veterinaria Scandinavica', 'Addiction Science & Clinical Practice', 'Agriculture & Food Security', 'AIDS Research and Therapy', 'Algorithms for Molecular Biology', 'Allergy, Asthma & Clinical Immunology', and 'Alzheimer's Research & Therapy'. A small number '19' is visible in the bottom right corner of the screenshot.

Health Policy and Planning:

<http://heapol.oxfordjournals.org>

The screenshot shows the Health Policy and Planning journal website. The main title 'Health Policy and Planning' is at the top. Below it, there is a navigation bar with links for 'ABOUT THIS JOURNAL', 'CONTACT THIS JOURNAL', 'SUBSCRIPTIONS', 'CURRENT ISSUE', 'ARCHIVE', and 'SEARCH'. The main content area displays an article titled 'Health policy and systems research: defining the terrain; identifying the methods' by Anne Mills. The article is highlighted with a red box. To the right of the article, there is a 'This Article' section with details about the publication, including the volume and issue information, and a 'Current Issue' section with a cover image and a link to 'Alert me to new issues'. A search bar is also visible at the top right.

Cochrane library: <http://www.cochrane.org/>

The screenshot shows the Cochrane Collaboration website. At the top, it says "The Cochrane Collaboration Working together to provide the best evidence for health care". There is a navigation menu with "Cochrane Reviews" highlighted. A sidebar on the left lists various options under "Cochrane Reviews", including "Browse free summaries", "About The Cochrane Library", "Top 50 Reviews", "Prioritising Cochrane Reviews", "Evidence Aid Project", "Citing our products", and "Other Cochrane publications". The main content area features a quote: "How do you know if one treatment will work better than another, or if it will do more harm than good?" and text explaining that Cochrane Reviews are systematic reviews of primary research in human health care. A "Did you know?" box contains a quote about the frequency of searches and abstract reads. The page also includes a search bar and a "GO TO THE 20th ANNIVERSARY SITE" link.

In-country resources:

<http://moodle.yds.edu.vn/tcyh/>

The screenshot shows the website for "Y HỌC THÀNH PHỐ HỒ CHÍ MINH" (Ho Chi Minh City Medical Journal). The page has a dark blue header with the journal's name and ISSN 1859-1779. Below the header is a search bar with a "Keywords" input field and a "Tìm" button. A sidebar on the left lists years from 2013 down to 2001. The main content area displays information for the year 2010, including a link to "Thế lệ đăng bài trên Tạp chí Y học TP Hồ Chí Minh" and details about the journal's type and publication date. At the bottom, there is a "Đăng nhập" (Login) section with fields for "Username:" and "Password:".

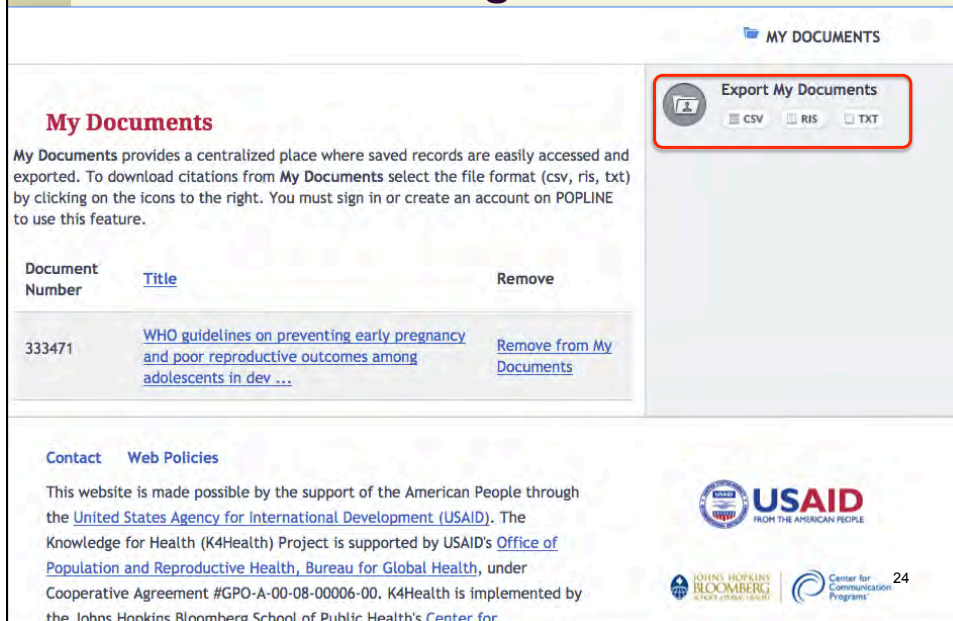

22

3. Sort and manage the literature

- For electronic sources: need to “**export**” the information in the proper format
- For other sources: need to key-in and store in one place with electronic information.
- Need to compile them into a “library” of literature for later use (in writing)
- Software/tools is needed

24

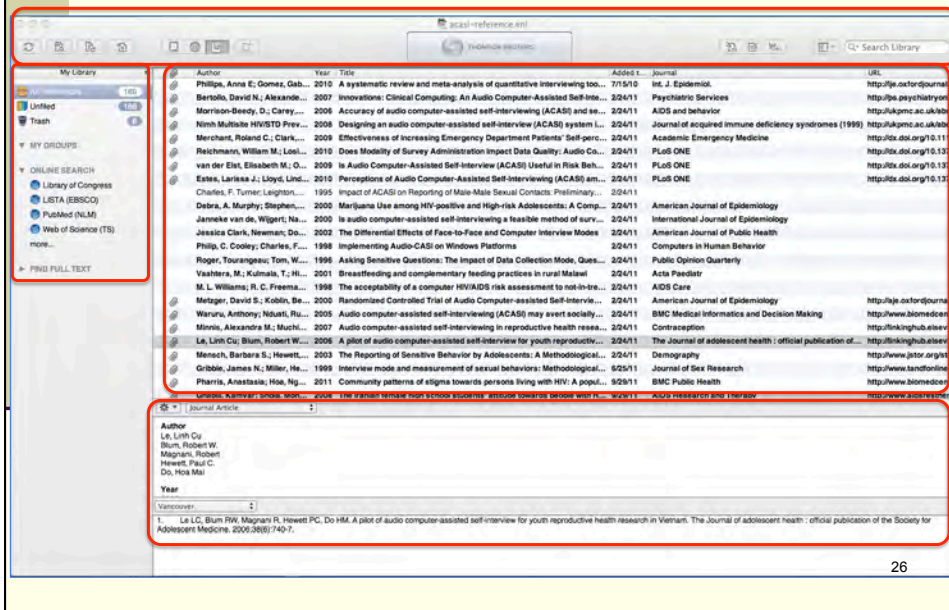

3. Sort and manage the literature

- ENDNOTE: <http://endnote.com>

25

3. Sort and manage the literature

26

3. Sort and manage the literature

- Tool like ENDNOTE helps us to:
 - Extract/ export/ import the literature as reference
 - Store them in a “library”
 - Manage, and use that library in writing, searching more references
 - MOST importantly: properly formatting our references and citation during the writing.

27

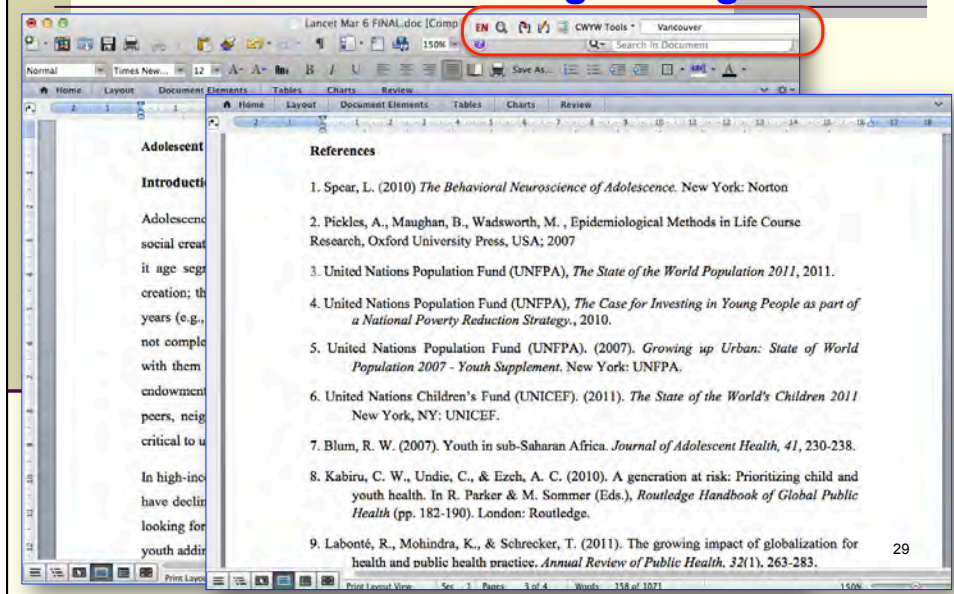

4. write the “literature review”

- Several steps:
 - Read those documents/ literature that we collected
 - Sort them by the relevance and importance
 - Prepare draft of the literature review. We should refer the the “tree” of problem analysis
 - Insert reference during writing

28

4. write the “literature review”

■ Insert reference during writing

4. write the “literature review”

- Insert reference following **Vancouver** (“author-number”) system, **Harvard** style (author year) or **APA** style (very similar to Harvard)
- In the **Harvard** system, the author's surname and year of publication are **cited** in the text.
 - For example: in-text citation:
“An effective structure is important” (Redman, 2006, p. 22)
 - and in the reference list (at the end):
Redman, P., 2006. *Good essay writing: a social sciences guide*. 3rd ed. London: Open University in assoc. with Sage.

30

4. write the “literature review”

- In the **Harvard** system, the reference list at the end should look like this:
 - Communicable Disease Center, 1953. *Communicable Disease Center Activities 1952-1953*. Public Health Service Publication Number 391. Atlanta: Department of Health, Education, and Welfare.
 - Dhingra, N., Jha, P., Sharma, V. P., 2010. *Adult and child malaria mortality in India: a nationally representative mortality survey*. The Lancet, 376, 1768-1774.
 - Hopkins, R. S. 2005. *Design and operation of state and local infectious disease surveillance systems*. Journal of public health management and practice: JPHMP, 11, 184-190.
 - Redman, P., 2006. *Good essay writing: a social sciences guide*. 3rd ed. London: Open University in assoc. with Sage.

31

4. write the “literature review”

In **Vancouver** style system:

- **In the text:** References are numbered consecutively in the order they are first mentioned. Place each reference number in parentheses, throughout the text, tables, and legends. If the same reference is used again, re-use the original number. For example:
and practice guidelines.(4,5) Even when recommendations come from such rigorous approaches.

32

4. write the “literature review”

- In the *Vancouver* system: **the reference list:** List all references in order by number, not alphabetically. Each reference is listed once only, since the same number is used throughout the paper.

33

4. write the “literature review”

- In the *Vancouver* system, the reference list at the end should look like this:
 1. Kunikata H, Shiraishi Y, Nakajima K, Tanioka T, Tomotake M. The relationship between psychological comfort space and self-esteem in people with mental disorders. *J Med Invest*. 2011 Feb [cited 2011 May 31];58(1-2):56-62. Cited in: PubMed; PMID 21372487
 2. Tatem AJ, Campiz N, Gething PW, Snow RW, Linard C. The effects of spatial population dataset choice on estimates of population at risk of disease. *Popul Health Metrics* [Internet]. 2011 Feb 7 [cited 2011 May 31];9(4). Available from: <http://www.pophealthmetrics.com/content/pdf/1478-7954-9-4.pdf>
 3. World Medical Association. WMA Statement on Patient Advocacy and Confidentiality [Internet]. Ferney-Voltaire (FR): World Medical Association; 2006 Oct 14 [cited 2011 May 31]. Available from: <http://www.wma.net/en/30publications/10policies/a11/index.html>

34

4. write the “literature review”

4. Vlahov D, Freudenthal N, Galea S. Cities and population health. *Soc Sci & Med.* 2005;60(5):1017-33.
5. Vaclavik V, Christian EW. *Essentials of food science.* 3rd ed. New York: Springer; 2008. 571 p.
6. Vatish M, Groom K, Bennett P, Thornton S. Management of threatened preterm labour. In: Norman J, Greer I, editors. *Preterm labour: managing risk in clinical practice.* Cambridge (UK): Cambridge University Press; 2005. p. 191-209.
7. Campo EM, López L, Ferreira V. Hierarchy and identification of additional important wine odorants. In: Bredie LP, Petersen MA, editors. *Flavour science: recent advances and trends.* 11th Weurman Flavour Research Symposium; 2005; Roskilde, Denmark. Amsterdam: Elsevier; 2006. p. 213-16.

35

4. write the “literature review”

A good “literature review”:

- covers a large range of documents and information (both officially published and “grey” literature)
- covers many up-to-date knowledge: should review most recent 5 years of the international literature.
- highlight the core problems and relevant factors, any key findings, solutions, etc.

36

4. write the “literature review”

A good “literature review”:

- has coherent discussion in our own words, using all relevant literature linked to each other (may cite several sources for one statement)
- shows “gaps” and / or inconsistencies that need more attention, further studies and explanation
- points out what should be done to solve those problems.

37

Homework / Exercise:

- Try all possible sources (offline, online) to collect information for the literature review of your research project / proposal
 - Online search and reference collection / management using EndNote is highly recommended.
 - Search and download full-text documents whenever you can.

38

ENDNOTE demonstration

Extra slides

Zotero: a free tool (but not very convenient !)

- Plug-in for Firefox web browser
- Only works with Firefox
- Not easy to use

40

zotero

- Free tool: Zotero: <http://www.zotero.org>

The screenshot shows the Zotero website homepage. At the top, there is a navigation menu with links for Home, Groups, People, Documentation, Forums, and Get Involved. A search bar is located to the right of the menu. Below the navigation, the main heading reads "Zotero [zoh-TAIR-oh] is a free, easy-to-use tool to help you collect, organize, cite, and share your research sources. It lives right where you do your work—in the web browser itself." A prominent red "Download Now" button is positioned to the right of this text. Below the main heading, there are icons for "Collect", "Organize", "Cite", "Sync", and "Collaborate". A secondary heading says "Grab your research with a single click." and "A personal research assistant." At the bottom, a small inset image shows a browser's address bar with a "Save to Zotero" button overlaid on it.

41

zotero

- Export to Zotero right there in Firefox

The screenshot displays a PubMed article page. The article title is "Placental malaria prevalence of infestation amongst febrile pregnant women in central India: maternal and perinatal outcome." The authors listed are Guin G, Shaw K, and Khare S. The abstract text reads: "OBJECTIVE: To determine the prevalence and impact of placental malaria on maternal and fetal outcome. DESIGN: Cross sectional observational. SETTING: The Department of Obstetrics of Government NSCB Medical College Hospital, Jabalpur (Madhya Pradesh). POPULATION: Five hundred parturient women with fever or history of fever during the present pregnancy. METHOD(S): Subjects were tested for peripheral and placental malaria by thick and thin smear examination. Maternal and perinatal outcome correlated with malaria results." On the right side of the page, there is a "Save items" section with a dropdown menu set to "Add to Favorites". Below that, there is a "PubReader" section with a "Click here to read article using PubReader" link. At the bottom right, there is a "Related citations in PubMed" section with a count of 42.

zotero

The screenshot shows a web browser window with a PubMed article page. The article title is "Placental malaria prevalence and infant mortality amongst febrile pregnant women in central India: maternal and perinatal outcomes". The author is Guin G, Shaw K, Khare S. The journal is J Obstet Gynaecol India, 2012 Feb;82(1):25-31. doi: 10.1007/s13224-012-0153-9. Epub 2012 Apr 20.

A blue arrow points from the article title to the Zotero library table. A red circle highlights the Zotero library table.
