Screening test

- How do you interpret the figure?
- The website showing the figure says “the tests are not perfect”. Why?
- It also says that “the CFR (case-fatality rate) varies by location, and is typically changing over time.” Why? What is CFR?

Tests conducted vs. Total confirmed cases of COVID-19

Most recent data as of 20 March [18.00GMT]. Data collected by Our World in Data from official country reports. For some countries the number of tests corresponds to the number of individuals who have been tested, rather than the number of samples.
