福島県立医科大学では、高度医療巡回支援として、エコノミークラス症候群、心のケア、小児・感染症、看護保健の各対策チームを編成し、県内の避難所等で医療活動を展開しています。
この高度医療巡回支援に、4月25日（月）から、国際医療支援としてヨルダン王国医師団が本学エコノミークラス症候群対策チームに参加しています。
さらに、5月9日（月）からは、タイ王国医療チームが本学小児・感染チームに加わる予定です。
世界各国からの医療支援に感謝を申し上げます。

FMU welcomes international medical teams.

3 May 2011, Fukushima City, Japan

Fukushima Medical University's service to earthquake, tsunami, and nuclear accident victims includes special attention to the needs of displaced persons. Mobile medical teams from FMU visit refugee shelters around the prefecture. Deep venous thrombosis (DVT, also known as “economy class syndrome”) is a particular risk for refugees with limited mobility and insufficient fluid intake. Mental health is another pressing matter for people coping with loss. Teams dedicated to DVT prevention and care, mental health services, pediatric infection control, and nursing support have been “on the road” from the very start of our disaster response.

It’s a big job, so we were pleased to welcome a medical team from the Hashemite Kingdom of Jordan on May 25. They are assisting specifically with DVT/economy class syndrome, and also bring a wealth of knowledge about advanced medical care in adverse circumstances.

From May 9, FMU will also welcome a medical team from the Kingdom of Thailand to assist especially with pediatric infection control.

In a national crisis with international ramifications, it is humbling and gratifying to receive support of all kinds from around the globe. Faculty and staff have been heartened by kind messages from international colleagues and friends. We also know that elsewhere in the world, disasters that preceded ours, and disasters that have come since, need ongoing attention. Our prayers are offered in thanksgiving for what we have received, and in petition for others who are also in difficult circumstances.

_Fukushima Medical University's unique history began in Shirakawa City, where a medical arts college was founded in 1871. The college moved to Sukagawa City soon after. In 1944, Fukushima City was selected for Fukushima Women’s Medical College, which reverted to Fukushima Medical University in 1947. Postwar educational reform was introduced in 1952, an important milestone among many in 140 years of medical progress._
